

PRAISE FOR *VIRUS MANIA*

"This book has been written with the care of a master-craftsman, courageously evaluating the medical establishment, the corporate elites and the powerful government funding institutions. It is the result of expert knowledge and great attention to details. I am editing standard medical textbooks myself, so I esteem the decades of efforts needed to research and write a book like this."

—Wolfgang Weuffen, MD, Professor of Microbiology and Infectious Epidemiology

"I have been so riveted reading this book that once, while standing on a platform of a major train station, I didn't even notice the intercity train stop right in front of me and then go on without me. The authors are absolutely right in saying that the virus hunters tend to work with unfounded sensationalized news based on the formula of hype and hope. Thereby, the CDC or the RKI snatch research funds worth many billion dollars, while the pharmaceutical industry generates high profits, among them Tamiflu maker Roche. This book is an important contribution against such kind of stultifications."

—Sievert Lorenzen, Professor of Zoology
